ELECTRICALLY HEATED BACK-LIGHT

Model	Part No.	Remarks
Austin Mini Range ... } Morris Mini Range ... } Riley Elf ... } Wolseley Hornet ... }	AKF 1453	65 watts Operating Consumption—5 amps.
Austin 1100 ... } Morris 1100 ... } M.G. 1100 ... } Riley 1100 ... } Vanden Plas 1100 ... } Wolseley 1100 ... }	AVA 293	84 watts Operating Consumption—6.5 amps.
Austin 1800 ...	AKF 1488	90 watts Operating Consumption—7 amps.
Austin A99, A110 ... } Wolseley 6/110 ... } Vanden Plas Princess Mk. I and } II ... }	AVB 321	57 watts Operating Consumption—4.4 amps.
Vanden Plas Princess 4-litre R ...	AVB 488	92 watts Operating Consumption—7 amps.
Illuminating switch for all the above models	AVH 6	

Switch No. 13H 1909 is also available, but as it is non-illuminating, must only be used in conjunction with an ammeter.

NOTE

These windows are laminated with fine, hair-like wires extending over an area of some 2 sq. ft. and concealed within the glass. The heating elements consume a heavy load and care should be exercised in their use. A warning light operates when the elements are switched on.

For list prices and discount codes please see the current Numerical Price List at the back of the book.

NOTES:

The B.M.C. Seat Belt is of the three-point anchorage type incorporating a lap strap with a diagonal shoulder strap. The patented metal-to-metal buckle has a quick release which, even under the most adverse load conditions, can be released with a pressure of only 8 lb. The whole belt is manufactured to British Standard No. 3254 and carries the British Standards Institute label.

Wearer's instructions are included with each kit. All B.M.C. Distributors and Dealers have been issued with fitting instructions and it is urged that only these authorized fitters be used.

For list prices and discount codes please see the current Numerical Price List at the back of the book.
